COAST ELECTRIC ANNUAL MEETING SATURDAY

ROUNDS

BAY ST. LOUIS, MISSISSIPPI, THURSDAY, NOVEMBER 13, 1952

SUBSCRIPTION PRICE

COAST ELECTRIC ANNUAL MEETING SATURDAY

November 15, 1952, is the day of the annual meeting of the Coast Electric Power Association, which is to be held at the Bay High School Gymnasium, Bay St. Louis, Mississippi.

The members of the power association will meet for the purpose of electing officers and directors, and also to elect a Board of Directors. Members of the Association will also receive reports from the various departments of the Association, including the report of the Treasurer, Mr. John S. Hester, and the report of the Secretary, Mr. C. W. Foust.

The meeting will begin at 7:30 a. m. and will continue until 11:00 a. m. The meeting will be held in the Bay High School Gymnasium, Bay St. Louis, Mississippi.

Early Bird prize—this is the Crosey Clock Radio.

Statutes added that every member of the association is entitled to one vote in the election of officers and directors, and that the election must be held in person and on hand at the time of the meeting.

Musical entertainment and prize awards will be given throughout the day's program. Among the prizes to be given are a Frigidaire Range, a Westinghouse Roaster, a Crosley Clock Radio, a Philco Table Radio, and Fifty (50) handsome Study Lamps valued at \$8.95 each.

There will be booth prizes in addition to those listed above, and each member registering will receive a registration gift. The Hancock County Chamber of Commerce has arranged for "B.B.A. Day Specials" at many of the Bay St. Louis stores. The Bay Chamber of Commerce has also arranged for a special lunch at a nominal price for the convenience of the out of town members and guests.

An excellent "Bill Billy Band" will be on hand to entertain the crowd throughout the day, and with the many fine booths that will be conducting open house, the day offers Coast Electric members quite an opportunity for an interesting as well as an entertaining day.

Employees and Officers of the Coast Electric Power Association are not eligible for prize awards. Any individual representing a member by proxy will not be eligible on that account alone, but if in addition to holding a proxy, the individual is a member, then the holding of the proxy will in no way deprive the member of his rights in the drawing.

STATE AGRONOMY CLUB NAMES REPRESENTATIVE

William Frederick Jones of Walnut Grove will represent the Agronomy Club of Mississippi State College at the national meeting of the American Society of Agronomy in Cincinnati, Ohio, November 17-21. Jones will meet with student representatives of other land-grant colleges in their own student section meetings, as well as with the adult agronomist.

Home Demonstration Work Explained

BY SARA WEAVER
HOME DEMONSTRATION AGENT

Home Demonstration work is a part of the County Extension Program of Hancock County. It is a "New Deal" project, as the name implies, and it is designed to help the rural people improve their homes and their living conditions. The Home Demonstration Agent is a woman who is trained to help the rural people in many ways, including the selection of better breeds of livestock, the improvement of their homes, and the improvement of their living conditions. The Home Demonstration Agent is also responsible for the organization and operation of the Home Demonstration Clubs. These clubs are organized in each of the four counties of Hancock County, and they are designed to help the rural people in many ways, including the selection of better breeds of livestock, the improvement of their homes, and the improvement of their living conditions. The Home Demonstration Agent is also responsible for the organization and operation of the Home Demonstration Clubs. These clubs are organized in each of the four counties of Hancock County, and they are designed to help the rural people in many ways, including the selection of better breeds of livestock, the improvement of their homes, and the improvement of their living conditions.

4-H CLUB WORK IN HANCOCK

BY P. D. HOUSTON
ASSISTANT CO. AGENT

There is only one organization in Hancock County which meets in all the schools and offers all boys in the county an opportunity to gain so much. This organization is the Hancock County 4-H Club. The purpose of the 4-H Club is to provide up-to-date information on all the latest farm practices in this area, leadership training for the boys in the club, and to help in the development of the total personality of the boys. There are 11 4-H Clubs in Hancock County. At present there are two hundred ten members over the county. All boys ten years old and above are eligible to become members if they wish, and we hope to enroll all boys in this age group in the club. We find that there are over 300 boys in Hancock County eligible to be members. All boys who have not joined this club are urged to do so at the next regular meeting.

The 4-H boys select a project to keep records on and to develop according to the recommendations of the Extension Department. At the end of the year these records are turned in to the State Office to compete with other 4-H members from all over the state. The winners of the different projects receive scholarships, educational tours, trips to Chicago and New York, and cash awards. Other functions of the clubs are the summer camps, school picnics and parties, hunting and fishing trips, and many other activities that make it enjoyable as well as educational.

APPROVAL IS GRANTED

Government approval for the location of a 20 million dollar nitro phosphate fertilizer plant at Pascagoula was announced Thursday. The plant will produce 150 tons of ammonia and 237 tons of nitric acid a day. It will consume 260 tons of phosphate rock daily. This rock will be brought by boat from Florida, and the result will be a daily production of fertilizer of 377 tons of nitro phosphate and 103 tons of ammonia nitrate. It was stated that the Defense Production Administration had granted a tax amortization certificate covering \$15,030,000 of the cost of the plant which is to be built by Gulf Improvement Co.

"FURNISHING DEFENDABLE ELECTRIC SERVICE TO THE RURAL AREAS OF HANCOCK, HARRISON AND PEARL RIVER COUNTIES"

WEDDING

Mr. and Mrs. Harry Taylor and Mr. and Mrs. Harry Taylor and children of New Orleans were guests of Mr. and Mrs. Walter Carver on Friday of this week. Saturday guests of the Carvers were Mr. and Mrs. Harry Carver and Mrs. Maurice Martin and daughter, Kelly.

A wedding of local interest was celebrated this week when Miss Shirley LaFayette, daughter of Mr. and Mrs. J. Nacine, became the bride of Mr. Anthony Bourgeois Jr., son of Mr. and Mrs. Anthony Bourgeois of Waveland.

The wedding took place Friday in Bay St. Louis and a reception was held immediately following at the "Top Hat" in Waveland. Mr. and Mrs. Charles Carver served as the young couple's attendants. Approximately one hundred guests attended the reception where they enjoyed delicious refreshments, punch, cake and soft drinks. The bride's table was covered with a lace cloth and was adorned with white decorations. In the center of the table was a beautiful four tiered bride's cake topped with a miniature bride and groom. The bride was dressed in an attractive navy blue suit and wore a white orchid. The couple are presently residing on Market Street in Waveland.

Another wedding of local interest and in New Orleans was the wedding of Mrs. Rose B. Condon of Waveland.

Mr. Ed Tucker has gained ten pounds and is again on the road to a fast recovery. We, his friends, hope it will be permanent.

Mrs. Lister and children, Fred and Larry, and daughter, Jeanne and Frances, spent the weekend in Waveland on Jeff Davis Ave.

Mr. and Mrs. Ott Brockman and Peggy Ann have returned to Laurel after a very pleasant stay with the Brockman and Hall families in Waveland and with relatives in Lakeshire.

Detective and Mrs. Ed Gipson and children, Mrs. L. J. Martello, and children, and Mr. and Mrs. J. R. Quaid were weekend guests of Mr. and Mrs. Ed Gipson.

Mrs. Hilda Erwin and Mr. and Mrs. Robert Ellis Jr. motored to Waynesboro, Mississippi, during the week-end.

'Miracle of Our Lady of Fatima' at Star Theatre

Nov. 16 Through 19

"The Miracle of Our Lady of Fatima," Warner Bros.' stirring true story drama of the famous miracle that occurred 35 years ago in the little town of Fatima, Portugal, opens at the Star Theatre on Sunday, Monday, Tuesday and Wednesday, Nov. 16 - 19. It is filmed in color by WarnerColor.

The story of the miracle goes back to May 13, 1917, when three shepherd children reported they had seen a vision in a field near the village.

The children declared the vision had promised to appear to them five more times on the same date in succeeding months. In these later meetings, the children reported, the vision had prophesied that World War I, then raging, would end shortly. Also there would be World War II. The apparition also predicted that two of the three children, Jacinta and Francisco, would die and that the third, Lucia dos Santos, their cousin, would live.

Some of the prophecies came true. Jacinta and Francisco died a few years later of influenza. Lucia lived and is now a nun in an Italian convent. World War I ended the year following the visions, and World War II occurred.

Perhaps the most amazing of the Fatima miracles was the climactic seen by the children which is now known as the "revolving sun" phenomenon and which occurred on Oct. 13, 1917. Thousands of spectators who were present on this day testified they, in addition to the children, saw the sun descended rapidly toward the earth and then as suddenly stop and return.

Persecuted by the Socialistic government, the children and their families withstood threats of jail and torture rather than give up their faith in the Lady of Fatima. The story, long one of the world's most dramatic expressions of faith, has Gilbert Roland and Susan Whitney in key parts.

Since the children reported the vision at Fatima, that little village just northeast of Lisbon has become one of the world's greatest shrines, and has been visited by millions of the faithful from all parts of the world.

"The Miracle of Our Lady of Fatima" was directed by John Brain.

GIRL SCOUTS MEET

Girl Scout Troop 4 opened their meeting Thursday, November 8, by forming a "Keweenaw" singing band and singing the "Keweenaw" song. The girls in the Keweenaw formation sang the Star Spangled Banner and said the Scout Law and Pledge.

Girl Scout Troop 4 then received the service and became a regular meeting. Thursday, Nov. 15, Joan Riddle will take the same service and become a regular Girl Scout.

Troop 4 is moving along smoothly and is now planning for a Christmas party for the poor children in Bay St. Louis. The girls are making and selling Christmas cards.

PORTRAIT OF AN "OIL MAN"

Most folks think of an "oil man" as a character in high-heel boots and a ten-gallon hat... more of a cowboy with a coat on than a modern businessman.

Novels and movies have dramatized the "wildcat well" and "boom-town" of the brawling days when "black gold" gushed from the Earth and the Oil and Gas Industry was born.

Times have changed. The "oil man" of 1952 looks like any other businessman. His efforts are no longer those of the haphazard ad-

Today's oil and gas business is a highly technical, highly specialized field of endeavor in which are employed the skills of thousands of workers, the capital of millions of investors, the hard-earned and dearly-bought experience accumulated over more than 50 years of operations, and every tool and technique that research and science have

The Oil and Gas Industry has found America's other major industry on the "first team" of this year's poll.

bilities that go with leadership in the American Way of Life. No other industry does more to assure the conservation of this nation's natural resources. No other single group

The Oil and Gas Industry makes a gigantic contribution to the economy of every state in which it operates, as well as to the national economy. Last year, the industry's contribution to the economy of Mississippi totaled over \$50 million.

\$10 million in county and state taxes, \$15 million in wages and salaries paid to its 3000 Mississippi employees, \$18 million in royalties, rentals and lease paid to Mississippi landowners and \$7 million spent for supplies and services for Mississippi

Yes, today's "oil men" is a valuable addition to your community. He is a wide-awake go-getter. His presence means more business for you, for where he goes employment goes and people live. He's civic-minded, too — he's learned what the bumper stickers and "responsibility" mean. He's a hard worker. He's a good neighbor. He's a good citizen. He's a good man. The new look of the oil man is a credit to you.

ern part of the county are typical of the more rolling country of the coastal plains.

Hancock County is within the long leaf pine region of the south. The tree predominated on the upland part of the county, and until a few years ago the original stand remained. Lumbering operations have removed this, as well as most of the merchantable timber from all parts of the county.

The climate of Hancock County is like most of the Gulf Coast region where extreme temperatures of both winter and summer are tempered by the moderating effect of the Gulf breezes. Most of the precipitation falls during the winter and spring and the least during the fall. The average annual precipitation is 60 inches.

Agriculture has never been extensively developed in Hancock County. Some of the more desirable lands have been cultivated for many years although at present, out of 310,400 acres in Hancock County only 61,163 acres or 19.7 per cent of the total land is in farms. In cropland are 16,986 acres, of which 8,598 acres are harvested, 7,066 acres in pasture lands, 22,500 acres in woodland, 13,134 acres in woodland pastures, and 1,433 acres other land. The 8,598 acres that are harvested cropland is 14 per cent of the total land in farms and only 2.8 per cent of the total land area of this county.

Various kinds of livestock have been kept since the first settlement of the county, and have been depended on as a reliable source of income. However, at this time the picture is slowly changing due to several factors: First, part of the range is being fenced up; second, pastures are being improved; and third, better breeding livestock is being secured.

Forestry is the leading income of the county with over a million dollars a year income, dairying is second with an income in excess of \$800,000 a year and beef cattle including range type third with an income of over \$400,000 a year in the county.

Very little progress was made in the agricultural field in Hancock County until the mid-thirties with the beginning of what we commonly call the third phase of the agricultural program. The first phase was when the Immigrants first settled in this country and lasted until the country was settled to the west coast and there was no more land to migrate to.

The second phase was when the con

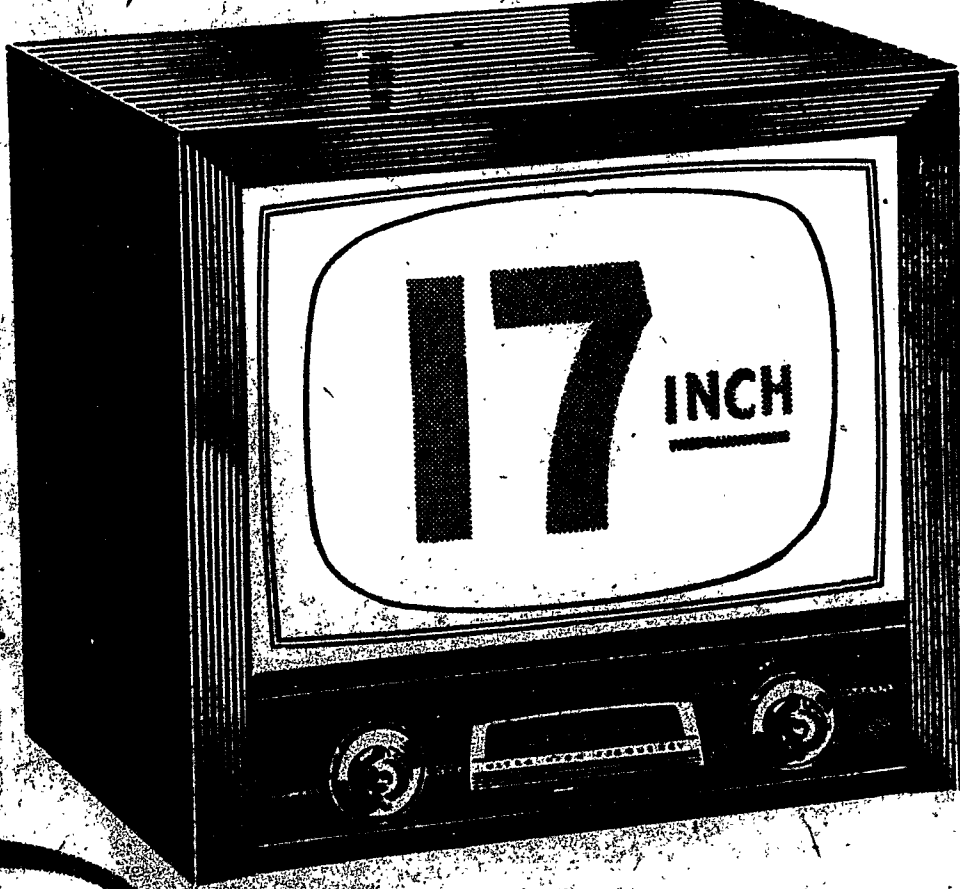

Give Olds a look—then give it the "go"! For a thrilling lift, we recommend a "Rocket" demonstration in the flashing Super '38! This is the car with a flair—with all of Oldsmobile's brilliant beauty—all of the "Rocket's" sensational action... The smooth, sure surge of power as the "Rocket" teams with Hydra-Matic Super Drive... The beautiful ease of parking, turning, maneuvering with Oldsmobile Power Steering... The added safety and convenience of the Automatic Eye! This is all-around driving at its best! Come in and ride the "Rocket"—there's nothing else like it!

BAY ST. LOUIS

...and the Game and Fish Commission is willing to let the best wildlife management area be set up in the state. With 15,000 acres under lease in George, Boone, Jackson and Harrison counties, the expenditure of contracts alone was a large task in spite of the fact that four major landowners—University of Mississippi, Dentler Lumber Company, International Paper Company and the U. S. Forest Service—held title to most of the area.

This task has been preceded by months of intensive biological research which established that this section of the state offered the best available wildlife habitat: deer, mixed timber stands and the longer growing season here.

Ever since the woods had been restored through good forestry practices, deer and turkeys going to the bottomlands along Red Creek for shade and food had found an abundance of browse species. Gallberry, myrtle, smilax, yucca, oak and honeysuckle abound. The swamp bay sheds its burrs beside the magnolia and dogwood. In the fields quail nest; the fox squirrels make their homes among the upland pines. In this mild climate the tit, while not actually an evergreen, scarcely ever loses all its foliage, and most of the branches can be reached by the deer.

But, this wild game paradise had its accompanying evil—illegal hunting—which enforcement officers calculated had increased as word got around that native populations of wild turkeys and deer roved the woods.

Controlled hunting appeared to be the solution to this problem which affected quantities of Mississippi wildlife.

Accordingly, with this as a major objective, work was begun to establish Red Creek Wildlife Management Area. In August Rolland Handley, Federal Aid Coordinator, received word that final federal aid approval had been obtained, making available to Mississippi seventy-five percent of the \$37,000 which would be required for the first three years. Handley estimated that of this amount \$20,000 would be spent the first year, including the annual cost of operation, planting of food crops and construction of fire lanes, checking stations and fence.

Controlled hunting, game management, research, and the building up and maintenance of large breeding stocks of deer and turkeys, are primary purposes of the area. Orin Havard, project leader who spent six months securing leases and will remain to assist with development, predicts that deer and turkey populations will be

Gardeners will find plenty of plants to choose from in the garden. The garden is the best place to find plants for the garden. The garden is the best place to find plants for the garden.

The gardeners will find plenty of plants to choose from in the garden. The garden is the best place to find plants for the garden. The garden is the best place to find plants for the garden.

Some gardeners tip the soil now to control plant lice on turnips, mustards and collard greens. These lice stunt plant growth by sucking the sap from the leaves.

Control these lice with a one per cent, or a one and one-half per cent rotenone dust. One pound of this dust will control plant lice in an average size home garden.

Leaf lettuce, kale, rape, and onions can still be planted out in the open throughout the State. In Hancock County add turnips, mustards, radishes and Swiss chard to this list.

DAIRY

Now is the time to plan your milk production for next spring. If your heifers are 15 to 17 months old you should watch them closely and breed them during November, December and January, so that they will freshen next fall.

For best breeding results the heifers should be gaining in weight but not fat. It is always good to supply additional feed before the breeding season. This is especially true this year when most animals have been on short pastures.

High quality hay placed in feed bunkers in pastures will do wonders for heifers approaching breeding age. If the heifers are in poor condition, feed two or three pounds of grain a day.

It is extremely important to breed heifers to the best bulls available. The service of the best bulls is available to all through artificial insemination.

Do not breed Jersey heifers under 500 pounds, Guernseys under 525 or Holsteins or Brown Swiss under 625 pounds.

POULTRY

Maintain high egg production this winter. Make sure that your hens are comfortable and well fed. Keep them warm enough. Make sure that there is enough floor space. Allow at least three and a half to four feet floor space for heavy breed hens.

Plenty of water is a must. It should be clean and fresh. A hen's body is around 55 per cent water and an egg is 75 per cent water. Water is the cheapest feed available so make sure that your birds have plenty of it.

Give the birds a 13-hour day. By using lights in the poultry house, you give the birds more time to eat and drink water. This will stimulate egg production. And while it will not increase the total number of eggs laid in a year, it will increase the number laid in fall and winter when prices are highest.

Do not let chicken lice steal your egg profits. Hens heavily infested with lice do not lay as many eggs as lice-free hens. Use DDT to control lice. You can use this as a 10 per cent DDT dust or as a one per cent spray. To make the spray, mix one pint of 50 per cent DDT wettable powder with three gallons of water and spray directly on hens.

From left to right: Josephine Wagner, Janet Ebeland, Rei Ann Witter, Beverly Bandet, Shirley Buffin, Kay Kramer, Gerri Witter, Carol Bandet, Mary Palmer and Janet Miller.

Mr. Francis W. Greenberg selected the group of majorettes. Carlos Arnold, Sophomore, was chosen Drum Major. Kay Kramer, Sophomore, was chosen Captain.

Band Vacancy Filled By Francis W. Greenberg

The Bay High Band is fortunate to have Mr. Francis W. Greenberg, who has succeeded Mr. James Brent as Director for '52-'53 school session.

Mr. Greenberg is a graduate of Northwestern University, Evanston, Ill. He has a Master's Degree in Music Education.

The band officers were selected as follows: Keith Tonkel, junior, was selected president. Jimmy Kramer, junior, vice president. Janet Ebeland, junior, secretary, and Jerry Bienvenu, sophomore, treasurer.

The band looks outstanding with the large number of majorettes this year. They exhibited excellent skill at the half-times of Bay High Games.

MOSCOW ATTEMPT TO GET INFORMATION ON STATE MINERAL RESOURCES HALTED

An attempt by Moscow to get vital information on mineral resources in the State of Mississippi by the University of Mississippi by the State Geological Survey.

An organization identifying itself as Vsesojuzny Institut Mineralnogo Syr'ya Pychevski of Moscow, USSR, sent a book order to the University of Mississippi Press for four bulletins published by the Survey.

Bulletins ordered contain "actual estimates of the state reserve of vital minerals such as oil," the survey office said. The Russian school was informed that such orders must be cleared with the State Department in Washington.

"Besides," an office secretary said, "We've suddenly developed a shortage of these particular bulletins."

YOU GET THE ONLY FULL-TIME POWER STEERING

In the most beautiful CHRYSLERS ever designed!

IT WORKS FULL-TIME... unlike some other types of power steering which aren't effective till you exert up to 7 lbs. pressure on the steering wheel!

IT'S SAFER... on rough roads, soft shoulders, or in case of a blow-out! Hydraulic power helps you turn... and keep a true, steady course with a constant, predictable "feel" to the wheel.

You enjoy complete control of your car at all times... with no fatigue!

IT'S EASIER... 85% of the steering effort is taken off your hands... substantially more than any other type of power steering. Even with car at a standstill, you can turn wheel with one finger... a real boon in traffic, on hard-to-negotiate driveways or when parking!

New RCA VICTOR television...

with the Magic Monitor!

Acts like an engineer inside your set

For as low as \$199.95

The TV show goes on... but here's television with an amazing difference! RCA Victor engineers, who pioneered television, again lead the industry with a great new achievement—“Magic Monitor,” a new, intricate system of electronic circuits, brings you unbelievable picture quality!

ACTS LIKE AN ENGINEER INSIDE YOUR SET

In TV studios, engineers constantly “monitor” each other for the very best image. The electronic “Magic Monitor” does the same job automatically inside your new RCA Victor set... so the pictures you see are always the best the vision can bring you.

RCA Victor brings you television's first double-shielded and a completely shielded chassis to screen out picture from planes, cars, vacuum cleaners.

Power is stepped up—automatically. Weak signals are held, brightness held constant!

The best picture is tied to the best sound—automatic RCA Victor, the greatest name in television, stands behind every one of these sets. And remember—RCA Victor can get the RCA Victor Factory Service team covering expert television installation and maintenance.

COME TO OUR REA DAY Sunbeam PARTY

Sunbeam MIXMASTER
Lighter, Higher, Finer-Textured Cakes

Maximize new features for higher, lighter cakes—creamier, softer, milder textures—velvet-smooth icings, etc.

Sunbeam RADIANT CONTROL TOASTER
Automatic Beyond Belief

All you do is drop in the bread. Bread toasts itself automatically. No levers to push. Toast rises itself slowly—no popping or banging. Every slice is moist, dry, thick slices or thin.

Sunbeam COFFEEMASTER
Perfect Coffee Every Time

It's automatic—you can't miss. All you do is put in water and coffee. Set it for perfect time off when you want it done. Means to keep coffee hot.

Sunbeam Steam Cooker

Plug in for STEAM just as you do for current. No lifting, no stirring, no mess. Steam cooks in 15 minutes.
